

**ICAO Organization**  
**Minimum Navigation Performance Specification Airspace**

Edition 9 of the 'North Atlantic MNPS Airspace Operations Manual' is now available for download. Edition 9 of the MNPS Manual consists of 6 separate files; there is the Manual itself and then five separate diagram pages. Each of these files is downloadable separately from the link below. Alternatively, the six files have been zipped together into a single winzip file, this zip file contains the whole Manual. Additionally, the MNPS Manual is available as a (zipped) Word 97 file if you prefer that format. Finally a file showing the changes made from Edition 8 to Edition 9 is also available for download. This file is available in either PDF or Word 97 format.

IFALDA members played a significant role in the development of this document.
