Speakers:

Air France Fleet Dir. Phillipe Fournel- Flight Dispatch Asset

Air France Pilot Laure Pechaud- Non-CO2 Effect in Aviation

Air France SESAR ATM Raphael Eyrolle- Flight Dispatcher Perspectives in Trajectory Based Operations

What is TBO?

Data Exchange- TBO is a new way to increase data exchange around trajectory. New Technology- TBO introduced up to date technologies to enhance this data exchange.

Magic Square-TBO aims to introduce a magic square of seamless communication between all actors involved in the trajectory management.

Why do we need TBO?

Reduce Volatility, Increased Predictability, Actual technology.

TBO & Flight Dispatchers:

Data exchange with TBO provide new opportunities for Dispatchers.

Easier optimization & better situational awareness.

Thank you to the Board and Directors for their hard work & support.  
Further like to thank Dave Porter for his constant support as Special  
Assistant to the President. -IFALDA Pres. Russ Williams

#### Closing Remarks

We look forward to continuing the effort of advancing the international voice & role of the Flight Dispatcher.

We welcome the challenge of global tracking as it pertains to Operational Control.

We will always assist our fellow Flight Dispatchers in regulatory & industry matters, by providing all resources required.

Feedback is welcome on our website – [www.ifalda.org](http://www.ifalda.org)
